

## Instructions for Downloading and Installing Support Files

3ds Max 2010 Architectural Visualization – Advanced to Expert contains several tutorials that require pre-created scenes and support images. The files needed for these tutorials can be downloaded in a single 257MB file by clicking [here](#). If you experience difficulty in downloading this file, the same support files can be downloaded in four smaller zipped files shown below. Once downloaded, these files can be unzipped into a single folder or placed in folders of your choosing.

[File 1 \(45MB\)](#)

[File 2 \(38MB\)](#)

[File 3 \(57MB\)](#)

[File 4 \(50MB\)](#)

[File 5 \(67MB\)](#)

The following is some additional important information:

Be sure to download the important ReadMe file for Chapter 3 by [clicking here](#).

If you like, you can watch a video demonstration of Chapter 8 (Render to Texture) by [clicking here](#).

Chapter 19 contains a series of aerial image files that should be downloaded. Due to their large size, a separate download is made available. To download, [click here](#).

We would also like to mention that because of the large number of files involved and the many individuals that played a part in their creation, it is possible that corrections may need to be made at some time in the future if a reader discovers an error with one of the files. If such an error is found, this page will be updated with only corrected files placed below.
